1. The following is an examiner's statement of reasons for allowance: The instant claims are considered to be allowable over the prior art of record in that such art does not disclose, teach or suggest the overall aspects of injection molding a thermoplastic lens by injecting melted thermoplastic into a mold cavity which is being heated up to a heating temperature which is at least equal to the molding temperature of the thermoplastic, the filling of the mold beginning before the heating temperature has been reached, this in conjunction with the application of a compaction pressure at the end of the filling and wherein both the compacting pressure and heating temperature are maintained for a given period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Spector et al, Kingsbury et al, Laliberte et al and Maus et al each disclose injection molding of thermoplastic lenses. However each reference teaches that the mold cavity should be brought to a desired temperature prior to injecting the thermoplastic. Shiao et al heats the thermoplastic and then injects it into a mold cavity.
